

**BOSE**<sup>®</sup>  
Better sound through research<sup>®</sup>

10 years of research

10,000 satisfied musicians

100,000 delighted audiences

## 1 entirely new approach

The musicians pictured above all have one thing in common. They use the Bose<sup>®</sup> Cylindrical Radiator<sup>®</sup> loudspeaker, and have eliminated monitors, PAs, mixers and their interconnections.

With this new approach, musicians and audiences alike are telling us of a whole new level of musical clarity and enjoyment.

Join us at the Martin Stage and Caffè Lena (room 602) where Folk Alliance artists will be using this unique approach to amplification.

Learn how to amplify your sound at [www.bose.com/musicians](http://www.bose.com/musicians).

Why wouldn't you try it — risk free — for 45 days? 1-800-905-0886.

Risk free refers to 45-day trial. Restrictions apply; call for details. ©2005 Bose Corporation. All rights reserved.
